

LEGOmyBOT! Robotics Excursion

A field trip for your organization that we will deliver at your school. A field trip that brings new and exciting STEM/STEAM learning experiences through Robotics and loads of challenging fun!

No Bus! No Fuss! No Packed Lunches!

Here's How it Works:

Call us to schedule a date and we'll take care of the rest! We bring the field trip to your organization for children grades 1st-5th. American Robotics Academy provides all build kits (value of \$2500) for the bots. Pre-built bots will be on hand for creative modifications for students to engage and collaborate in challenging activities. You say you want a themed event- we have a team of creative instructors that can bring it and meet your organization's needs! We also provide a challenge arena for students to bring their Robots to the game! Students will get to challenge their peers in specific activities utilizing the arena.

Cost: \$20 per child

Logistics/Set up: Gym, Cafeteria, Hallway, Science Lab, (tables & chairs are preferred)

Bot Builds: Bricks Slayers (BS): Join us on an adventure that requires creative thought, time management and team communication as groups build a diverse range of off-road vehicles that battle other robots, race against the clock and play tug of war!

Call Today to get on the Schedule!
